**The Lone Star Groundwater Conservation District encourages you to celebrate Earth Day on April 22, 2010**

What can you do to celebrate Earth Day? Be more water wise in all of your daily activities!

- If you are planting a tree or new plants, consider choosing drought tolerant varieties and adding a layer of mulch to your planting beds
- Check your irrigation system to make sure it is providing only the amount of water necessary
- Check in and around your home for leaks and repair them promptly
- Reduce, Reuse, Recycle
- Challenge your neighbors to reduce their household water and energy use
- Attend an Earth Day event in your area
- Make a pledge to use water more efficiently and be more aware of the health of your environment

For more information on water efficient practices, please contact:
