

Lone Star Water Conservation District Tour MC Extension Service Rainwater Harvesting Operation

The rainwater harvesting tank on the north side of the MC Extension Service Building, with the new dedication plaque.

Commissioners of the Lone Star Water Conservation District have lunch in the pavilion before the tour of rainwater harvesting facilities at MC Extension building.

Members of the Lone Star Water Conservation District, which provided a substantial portion of the funding for the rainwater harvesting system at the MC Extension building, toured the operation Tuesday, September 14.

Commissioners were also treated to lunch in the pavilion and braved the heat as County Extension Service Agent Tom Leroy (also braving the heat) described the system in detail. MC Rainwater Harvesting Specialists assisted.

Montgomery County Extension Agent Tom Leroy describes the rainwater harvesting system to Lone Star Water Conservation District commissioners.

Lone Star Conservation District members and Rainwater Harvesting Specialists listen as Tom Leroy explains the rainwater harvesting facilities at the MC Extension building.
