The Lone Star Groundwater Conservation District asks residents of Montgomery County to reduce outdoor discretionary uses of water:

- Don't allow sprinklers to water the pavement. Reset your irrigation schedule to reduce runoff
- Use a nozzle with a shut off valve with your hose
- Shut off your irrigation system when it rains, or install rain sensors

Have a leak?

- Check your water meter. If no water use is occurring in the business or your house and your dial is moving, you have a leak!
- Leaks can waste a great deal of water, repair leaks as soon as possible.
